

Geolives-M, discover, create and share audio guides around the world

GEOLIVES-M

Geolives-M is an iPhone application to create, search and share audio guides from around the world ! It uses Google Maps, or topographic maps from National Mapping Organisations, and high professional quality voice synthesis that can read your text descriptions in more than twenty languages. This application also allows you to record your own GPS trails by type of activity and access thousands of geo-referenced Wikipedia articles!

Along your route, information in text-speech, images, YouTube videos, ... are triggered automatically with the integrated GPS in your iPhone.

The audio guides are quick to download and bring you a unique experience along your journey. It is more fun and enjoyable !

GEOLIVES COMMUNITY SITE

WWW.GEOLIVES.COM is a website offering several software solutions dedicated to outdoor activities. It allows you to acquire detailed topographical maps from many European countries: Belgium, France, Holland, Ireland,

Switzerland, for your computer or smartphone, Specifically, this allows you to create routes and audio guides for the forest, moors or mountain, ... that is to say off the beaten track.

ROUTEYOU COMMUNITY SITE

WWW.ROUTEYOU.COM is also a website to create and share multimedia routes, but worldwide. This uses Google Maps and advanced route capture techniques. There are already more than 180,000 routes around the world classified by type of outdoor activities: hiking, horse-riding, mountain biking, cycling, via ferrata ...

POI WITH WIKIPEDIA

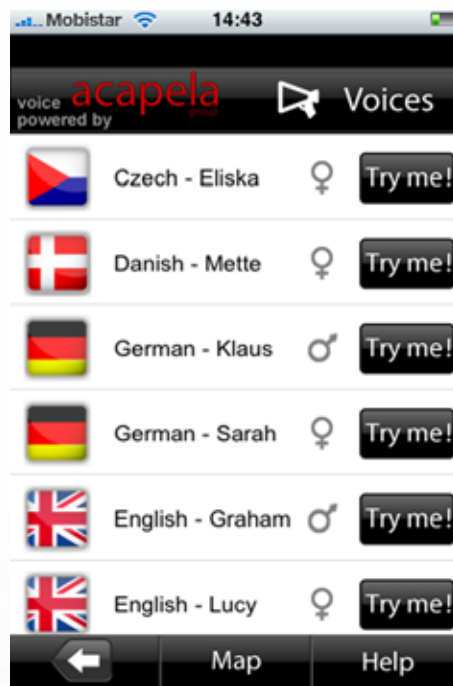

Everyone knows Wikipedia, the free encyclopedia. Learn more about your area when you're travelling or on business trips using more than 200,000 georeferenced full-text articles from Wikipedia ! The synthesized voice will read automatically on your iPhone the first sentences of each article, when you approach one of these points of interest. The full article is clearly presented and available to access more information.

Follow the link below if you want to help the community to reference other items in your area: http://en.wikipedia.org/wiki/Wikipedia:WikiProject_Geographical_coordinates

PROFESSIONAL VOICE SYNTHESIS

Do you need someone to guide you, available 24/7 ? Yes someone is available! Listen to excerpts on your iPhone and select the language and the gender of your faithful companion.

TOURIST OFFICES AND PROFESSIONAL PUBLISHERS

Within the GeoLives-M application there is a Gold category specifically designed for tourism professionals and publishers who want to ensure the accuracy and quality of information supplied to the general public. GeoLives can make their expert advice available to a mobile audience. Whether the user is a seasoned traveller or a novice explorer, heading Gold gives expert recommendations to help discover a region.
